Company Overview

INTRODUCTION

Satnam Global Infraprojects Limited (SGIL), established in 1987, has built an exceptional reputation over three decades as a distinguished turnkey contractor and service provider with diversified engineering and infrastructure solutions provider, specializing in the Supply, Erection, Testing, and Commissioning of projects across multiple sectors, including Electrical, Power, Mechanical, ITOT, and Smart Metering. With a proven track record in delivering high-impact projects, we serve Central and State Governments, Public Sector Units, and private enterprises. Our expertise extends to critical industries such as Oil & Gas, Power Transmission, Solar, Nuclear, and Thermal Power Plants, as well as advanced smart metering initiatives.

With deep expertise in project management and third-party inspection, SGIL has played a pivotal role in electrical transmission projects and substations across various states. Notably, we are spearheading an advanced metering infrastructure project in Meghalaya, installing 200,000 energy meters under the ADB-funded DBFOOT model, leveraging our in-house solutions for HES, MDM, cloud servers, and comprehensive software integration. Furthermore, we are executing a prestigious approx. 295000 Smart Energy Meters in Mizoram under AMISP Project also executing smart water metering project for Thrissur Municipal Corporation, Kerala, cementing our leadership in advanced metering solutions.

Our state-of-the-art manufacturing facilities in Kota, Nagpur, and Noida are ISO-certified and aligned with international standards, enabling us to deliver high-quality equipment for complex power sector projects. With a workforce of highly skilled engineering professionals, SGIL excels in challenging projects while maintaining an excellent safety record, earning accolades across industries.

We are committed to contributing to energy efficiency and sustainability through cutting-edge technology, ensuring client satisfaction, and upholding the highest standards of quality, health, safety, and environmental management.

We look forward to a successful and mutually beneficial relationship.

AREAS OF OPERATION

Area	Description
Design & Development	Detailed engineering and design of pressure vessels, tankages/silos, chimneys, piping systems, and fuel oil handling systems, including structural buildings/industrial sheds with electrification and lighting.
Electrical / ITOT	Comprehensive industrial electrical works — substations, HT & LT lines, aerial bunched cable lines, and smart meters (electrical & water) — including supply, transportation, erection, commissioning, transmission, distribution, maintenance, and handover under ITOT/smart solutions.
Smart Water Management System (SWMS)	Combines consumer/commercial smart meters and bulk AMR meters for consumption measurement and NRW detection, with water quality sensors for compliance monitoring; data flows via LoRaWAN gateways to the HES/MDM platform, powering a central dashboard and consumer app for accurate billing and data-driven operations.
Construction	Execution of projects involving fabrication, erection, and testing of steel structures, piping, and equipment — storage tanks, pressure vessels, silos, chimneys, material handling systems, ducting, HVAC, blasting, and painting.
Revamping	Mechanical revamping of fertilizer, cement, synthetic fibre, and fuel-oil-based power plants, including electrical substations, material and fuel handling systems, material stacking systems, coal handling plants, and de-dusting systems.
Manufacture & Supply	Fabrication and supply of process equipment — vessels, tanks, reactors, heat exchangers, distillation towers, hoppers, machine-base structures, trolleys, and bins.
Supply	Raw materials including steel plate and structural sections, pipes, pipe fittings, and valves.
Packages	Complete systems for DG sets and boilers, including fuel oil handling, electrical and instrumentation works, LV power distribution and lighting, stone crushing plants, and balance-of-plant works for thermal power projects.
Shutdown & AMC	Planned shutdown and annual maintenance contract services for fertilizer, refinery, cement, and chemical process plants.
Testing & Inspection	Radiography, ultrasonic flaw detection, ultrasonic thickness testing, magnetic particle testing (dry & fluorescent), and stress relieving; third-party inspection services for electrical projects.
Manpower Supply	Skilled and semi-skilled manpower across mechanical, electrical, and civil disciplines.
Hiring	Cranes, forklifts, JCBs, hydras, trailers, and other construction equipment.
